

Intro to Music Technology

This class will offer the basics in using technology to compose, record and arrange music. Students will work to create podcasts and film scores. Throughout the class, we will discuss popular music industry jobs, such as commercial advertising, media production, acoustic engineering, TV/Radio production, e-media, and web production. Students will also learn about the ever changing legal and ethical issues in Digital Music. We will learn about audio equipment and the necessary tools to create studio quality recordings. Students will also have the opportunity to research the most recent advances in music technology.
